

# Liquid Product Filling Machine

- ✓ This is a volumetric filling machine that works with FESTO pneumatic system
- ✓ Easy to adjust and record the filling range by the numerator and the hand wheels
- ✓ It primes the product from the storage tank directly
- ✓ The parts on the machine are made of high quality Turkish materials

**NUMBER OF CYLINDERS :**

1

**FILLING RANGE :**

Min. 2ml - Max 5000ml

**OPTIONAL CYLINDER :**

Min. 5ml - Max. 50ml

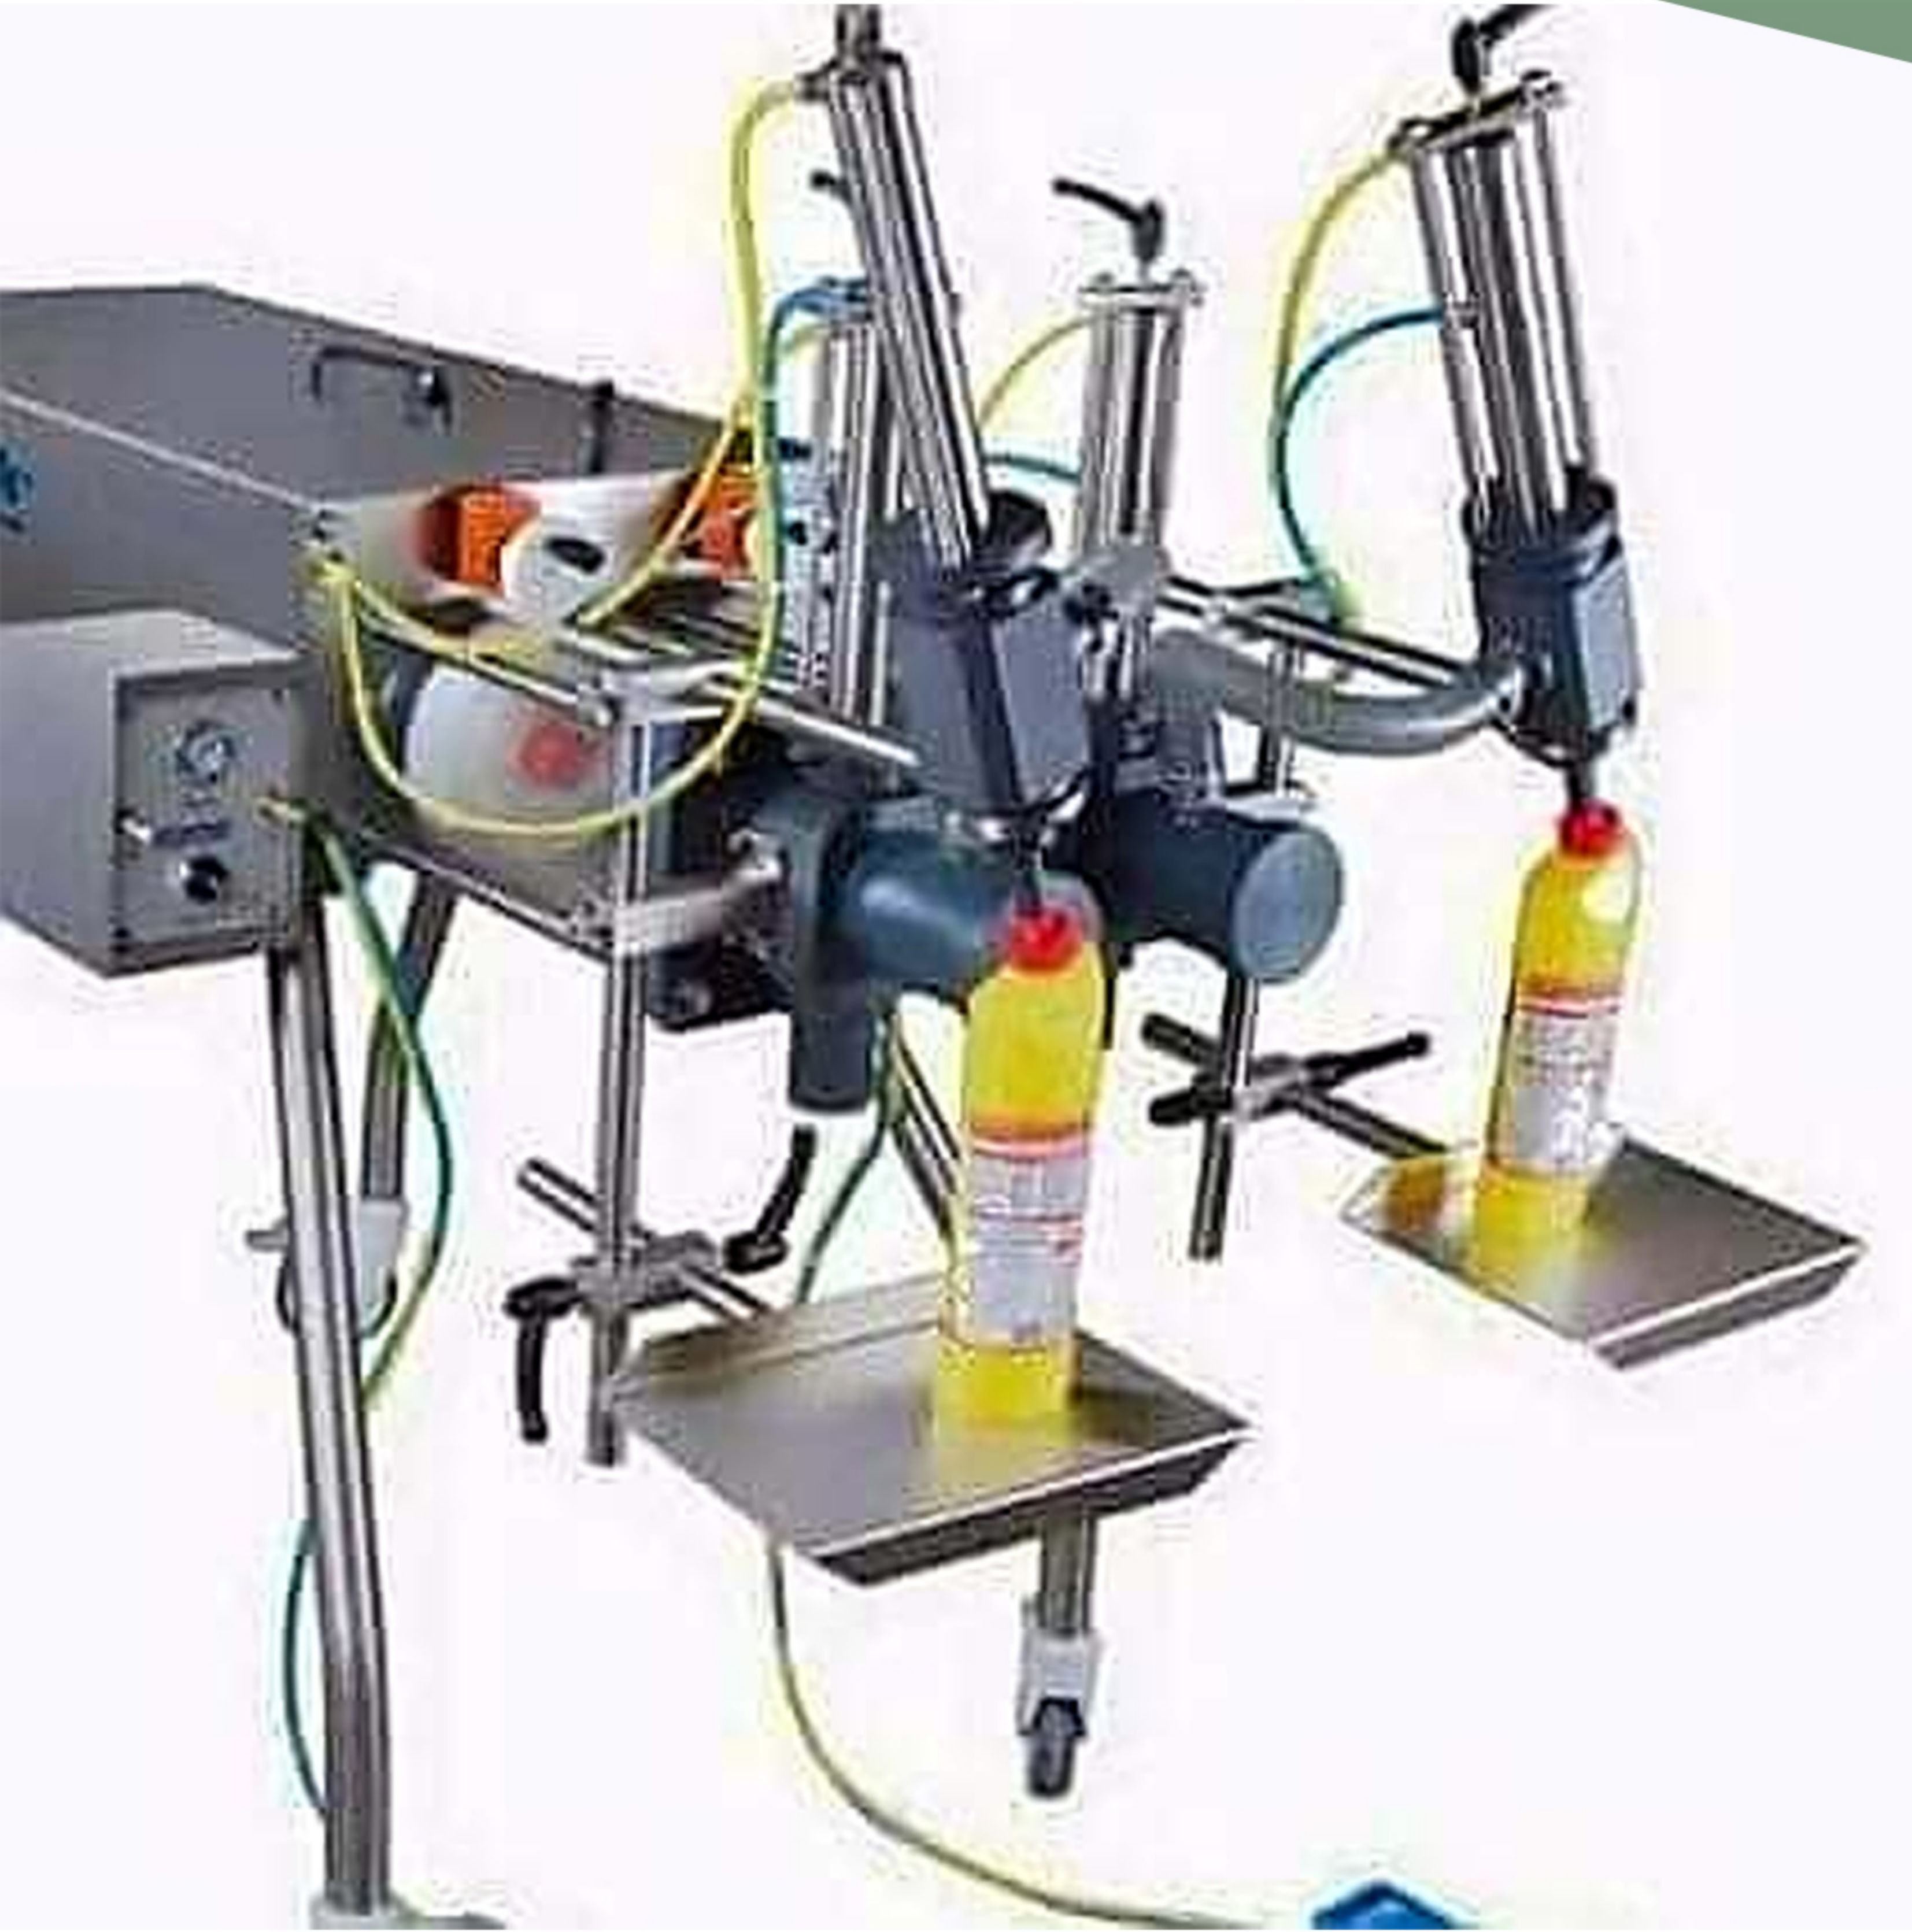

**CAPACITY :**

350 Packages/Hour

**The machine can be customized according to the customer's request**

# **Liquid Product Filling Machine TWO HEAD**

- ✓ **This is a volumetric filling machine that works with FESTO pneumatic system**
- ✓ **This machine is intended for packing all kinds of chemicals such as (detergents).**
- ✓ **It primes the product from the storage tank directly**
- ✓ **The parts on the machine are made of high quality Turkish materials**

**NUMBER OF CYLINDERS :**

2

**FILLING RANGE :**

Min. 2ml - Max 5000ml

**OPTIONAL CYLINDER :**

Min. 5ml - Max. 50ml

**CAPACITY :**

600 Packages/Hour

**The machine can be customized according to the customer's request**

# **Liquid Product Filling Machine**

## **Vertical - Half automatic**

- ✓ **This is a volumetric filling machine that works with FESTO pneumatic system**
- ✓ **This machine is intended for packing all kinds of chemicals such as (detergents).**
- ✓ **It can be customized with fixed head or movable head**
- ✓ **The parts on the machine are made of high quality Turkish materials**

**NUMBER OF CYLINDERS :**

**2**

**FILLING RANGE :**

*Min. 2ml - Max 5000ml*

**OPTIONAL CYLINDER :**

*Min. 25ml - Max. 150ml*

**CAPACITY :**

*600 Packages/Hour*

***The machine can be customized according to the customer's request***

# ***Viscous Products Filling Machine***

- ✓ **This is a volumetric filling machine that works with FESTO pneumatic system**
- ✓ **This machine is intended for packing high viscosity liquid materials  
Such as: honey, creams, Chocolates, jams and sauces**
- ✓ **It can be customized with fixed head or movable head**
- ✓ **The parts on the machine are made of high quality  
Turkish materials**

**NUMBER OF CYLINDERS :**

**1**

**FILLING RANGE :**

*Min. 2ml - Max 5000ml*

**OPTIONAL CYLINDER :**

*Min. 2ml - Max. 25ml*

**CAPACITY :**

*350 Packages/Hour*

***The machine can be customized according to the customer's request***

# ***Viscous Products Filling Machine TWO HEAD - Half Automatic***

- ✓ **This is a volumetric filling machine that works with FESTO pneumatic system**
- ✓ **This machine is intended for packing high viscosity liquid materials  
Such as: honey, creams, Chocolates, jams and sauces**
- ✓ **It can be customized with fixed head or movable head**
- ✓ **The parts on the machine are made of high quality  
Turkish materials**

**NUMBER OF CYLINDERS :**

**2**

**FILLING RANGE :**

*Min. 2ml - Max 5000ml*

**OPTIONAL CYLINDER :**

*Min. 2ml - Max. 25ml*

**CAPACITY :**

*600 Packages/Hour*

***The machine can be customized according to the customer's request***

# **12 HEAD FILLING MACHINES**

## **Half Automatic**

- ✓ **The level control system is synchronized with the transfer pump to start or stop**
- ✓ **This machine is intended for packing liquid materials**
- ✓ **Adjustable speed diving nozzle for foamy products**
- ✓ **The parts on the machine are made of high quality Turkish materials**

**NUMBER OF HEADS :**

12

**FILLING RANGE :**

Min. 500ml - Max 5L

**CAPACITY :**

1 Ton/Hour

***The machine can be customized according to the customer's request***

# ***Automatic CapClosing Machine***

- ✓ **It can close and tighten plastic, glass and metal caps**
- ✓ **The machine is designed according to the shape of the cap**
- ✓ **Made of PVC material**
- ✓ **The parts on the machine are made of high quality Turkish materials**

***Production capacity :***  
*2000 - 2500*  
*Cap/Hour*

***The machine can be customized according to the customer's request***

## **COLLECTING TABLE**

- ✓ **The diameter of the collecting table is 980mm or 1200mm**
- ✓ **The collecting table has 15 turns/minute**
- ✓ **The parts on the machine are made of high quality Turkish materials**

*DESIGNED FOR ANY SHAPE  
OF PACKAGES*

*EASILY INTEGRATED WITH  
ANY PACKAGING LINE*

***The machine can be customized according to the customer's request***

# Automatic Filling Machines

- ✓ The level control system is synchronized with the transfer pump to start or stop
- ✓ This machine is intended for packing liquid materials
- ✓ User friendly touch screen interface available in different languages.
- ✓ The parts on the machine are made of high quality Turkish materials

**NUMBER OF HEADS :**

4

**FILLING RANGE :**

Min. 500ml - Max 5L

**CAPACITY :**

1 Ton/Hour

*The machine can be customized according to the customer's request*

# **12 HEAD FILLING MACHINES**

- ✓ **A volumetric filling system controlled by a servo motor and diving nozzles**
- ✓ **The machine is manufactured according to the customer's request in terms of the number of nozzles and the amount of filling**

**The parts on the machines are made of high quality  
Turkish materials**

# ***FULL Automatic Filling Machine - CapClosing Machine***

- ✓ **The production line and production capacity can be customized by the customer's request**
- ✓ **User friendly touch screen interface available in different languages.**
- ✓ **The parts on the machine are made of high quality Turkish materials**

# ***FULL Automatic Filling Line***

## ***Basic Components :***

- 1- Filling Machine***
- 2- CapClosing Machine***
- 3- Labeling Machines***
- 4- Collecting Table***

**The parts on the machines are made of high quality  
Turkish materials**
